Curb / Service Boxes

Curb Box - General Information

We recommend that the length of curb box used for a specific bury be six inches longer than final grade. Example: If final grade is 5 foot, we recommend a 5 1/2" foot maximum extended length curb box. This will allow 6" for grade change in either direction.

- All Curb Boxes telescope one foot.
- Available lengths shown are listed at maximum extension.
- When curb box is supplied with shut-off rods, the rods are 18" shorter than the Curb Box at its maximum extension.
- Base sections and lids are made of cast gray iron.
- All pentagon plugs have a 27/32" point to flat size.
- Upper sections are steel pipe and telescope up/down within the base casting by 12".
- Upper sections are held in the desired position by a strong clip ring located inside the top of the base casting.
- A swedged lug at bottom of upper section fits into a cast slot in the base casting to prevent upper section from turning when removing lid or pentagon plug.
- Curb Boxes and Accessories are black dip coated inside and out.

Arch Pattern Curb Boxes

The “Arch” or “Y” base casting covers the Curb Stop without being mechanically connected. When required, the shut-off rod is attached (via brass cotter pin) to the tee head of the Curb Stop and remains in place inside the Curb Box. The top of the shut-off rod is formed in such a manner that it centers the top of the rod in the upper section of the 1” Curb Box upper section.

Shut-off rods are furnished as standard on Curb Boxes with 1” upper sections and are available separately for use with larger upper sections.

Minneapolis Pattern Curb Boxes

Minneapolis Pattern Curb Boxes have female threads machined into the bottom of the base casting that screw onto the male threads on top of all Minneapolis pattern Curb Stops. Threading the Curb Stop into the Curb Box gives a unified valve/box assembly. This arrangement assures their alignment.

Shut-off rod information listed above is also true when used with Minneapolis Pattern Curb Boxes with 1” upper section.

The charts below identify size of threads in base casting of Curb Boxes and at top of Curb Stops.

- Curb Boxes and Accessories are black dip coated inside and out.
A.Y. McDonald Mfg. Co. offers high quality cast iron service boxes with a wide range of options. All service boxes can be adjusted to the full range called out in our model numbers. The 2½” service box is designed for use with ¾” through 1¼” curb stops, as well as up to 2” curb stops with the use of the enlarged base. Boxes do not include rod or centering ring. (Ordered separately)

- Extension lengths are listed with other model information on pages 10 and 11.
- Available in water, sewer and gas
- Quality cast gray iron construction ASTM A48, Class 25
- Arch-style base
- Brass pentagon bolt locking lid
- May be ordered as assembly or components

**Screw Style - Model 5700**

Screw Style Service Boxes are designed with threaded or screw style castings. Top section "threads" onto bottom section and adjusts to desired height. Top section includes water lid as standard. Centering ring, rods and other lids are optional. Standard base will cover A.Y. McDonald Curb Stops to 1¼” size.

**Slide Style - Model 5705**

Slide Style Service Boxes are designed to telescope freely to the desired range of coverage. Top section includes water lid as standard. Centering ring, rods and other lids are optional. Standard base casting will cover A.Y. McDonald Curb Stops to 1¼” size.
